

# **5 Quick Steps For Task Manager Not Updating In Windows 11**

Task Manager is a vital tool in Windows 11 that allows users to monitor and manage system processes, performance, and applications. However, encountering an issue where Task Manager fails to update can be frustrating. In this article, we will explore some potential causes and provide troubleshooting steps to resolve the Task Manager not updating error in Windows 11.

## **Troubleshooting Steps for Task Manager is not updating in Windows 11:**

### **Update Windows:**

Ensure that your operating system is up to date by checking for and installing any pending Windows updates. These updates often include bug fixes and improvements that may address the Task Manager does not update issue in windows 11.

### **Possible Causes for Task Manager is not updating issue:**

#### **Software or driver conflicts:**

Conflicting software or outdated drivers may interfere with the proper functioning of Task Manager, leading to update issues.

## **Run the System File Checker (SFC) utility:**

System File Checker is a built-in Windows utility that scans and repairs all the corrupted system files.

1. Open Command Prompt as an administrator.
2. Enter the command “sfc/scannow” to initiate the scan.

Use Deployment Image
